

ARABLAB+ 2020..... NEW DATES

We would like to take this opportunity to share with you the situation with regards to **ARABLAB+**.

We decided to postpone **ARABLAB+ 2020** due to the overwhelming concerns of a majority of exhibitors, visitors, principals and agents who normally attend the event..... over their ability to travel to the Show, and the Health & Welfare of their staff. We felt that we could not guarantee a successful exhibition with the number and quality of visitors that our exhibitors have normally come to expect.

As you can imagine, with so many shows postponed not only in Dubai but globally it has been very difficult trying to establish alternative dates, and also respect the structures of other competitive industry International Trade Shows as well as the upcoming Dubai World Expo.

It has always been our long-term view to establish **ARABLAB+** as an annual show in the **September** window which would enable the show to expand and develop within the **SCIENCE & CHEMICAL** field.

As a result, we can confirm that whilst the rescheduled dates will be **07- 09 September** this year, we will be scheduling all future events from 2021 onwards as annual shows in **September** instead of March. This will then provide a balanced exhibition and seminar platform for manufacturers and visitors to plan their future business strategy around the successful "**ARABLAB**" brand.

Our website www.arablab.com is continuously being updated, so please continue to send us any current news on your organization.

Looking forward for your continued support.
